

WantItNow Opencart Shipping extension

Version: 2.0

About WantItNow

This is a shipping module built for Opencart. Version: 2.0

Requirement

Complete Package for OpenCart ver.1.5.2 or above.

Installation

vQmod

If your OpenCart store uses vQmod, simply upload all files from the 'upload' directory to the root directory of your OpenCart installation.

Non-vQmod

If your OpenCart store does not use vQmod, upload all files from the 'upload' directory to the root directory of your OpenCart installation and modify the catalog/model/checkout/order.php file in the following way:

Within the 'confirm' function, find the following line:

```
$template->data['totals'] = $order_total_query->rows;
```

and straight after it, add the following lines of code:

```
$this->load->model('shipping/wantitnow');  
$this->model_shipping_wantitnow->bookJobIfApplicable($order_id);
```

Configuration

1. Log into the OpenCart Admin
2. Go to Extensions > Shipping
3. Click on 'Install'.
4. Click on 'Edit' link for 'WantItNow'.
5. Turn on the module:

Switch the 'Status' option to 'Enabled'.

4. Configure other settings of the WantItNow module:
